Nguyen Hoang Phuc

Junior Software Developer | Unity & C++ | Product Experience

📧 nhphuc1562002@gmail.com 📞 0935 172 546 🎂 June 15, 2002
📍 Da Nang City, Vietnam

Profile Summary

Junior Software Developer with **1+ year of professional experience** specializing in Unity (C#) and C++ Desktop development. Proven track record delivering production-ready applications at **Prima Solutions**, including a Unity-based 3D scanning AR application for construction management and a professional CAD desktop application using C++ and MFC framework.

Strong focus on **system architecture**, **performance optimization**, and building **maintainable, scalable software** for real-world production environments. Experienced in cross-platform development, API integration, and collaborating with cross-functional teams.

Professional Experience

VinaCAD – CAD Desktop Application

Company: Prima Solutions

Role: C++ Developer

Duration: October 2024 - Present

Platform: Windows Desktop

C++ | MFC Framework | ODA SDK | DLL Architecture | CAD Development

VinaCAD is the first professional CAD software developed for Vietnamese users, providing core functionalities similar to AutoCAD. It serves as the center of an ecosystem including applications for planning, implementation, and reporting stages in construction and design workflows.

🔗 **Project Website:** https://vina-cad.com/vi

- **Implemented CAD commands and features** similar to AutoCAD using C++ and the ODA framework
- **Designed and maintained user interfaces** using the MFC framework for improved usability and stability
- **Built and managed dynamic libraries (DLLs)** to support modular software development and team collaboration
- **Troubleshot and optimized software performance** to ensure smooth functionality across the application
- **Managed build pipeline** and prepared software for official production releases

Onsiter – 3D Scanning & Construction Management App

Company: Prima Solutions

Role: Unity Developer

Duration: October 2023 - October 2024

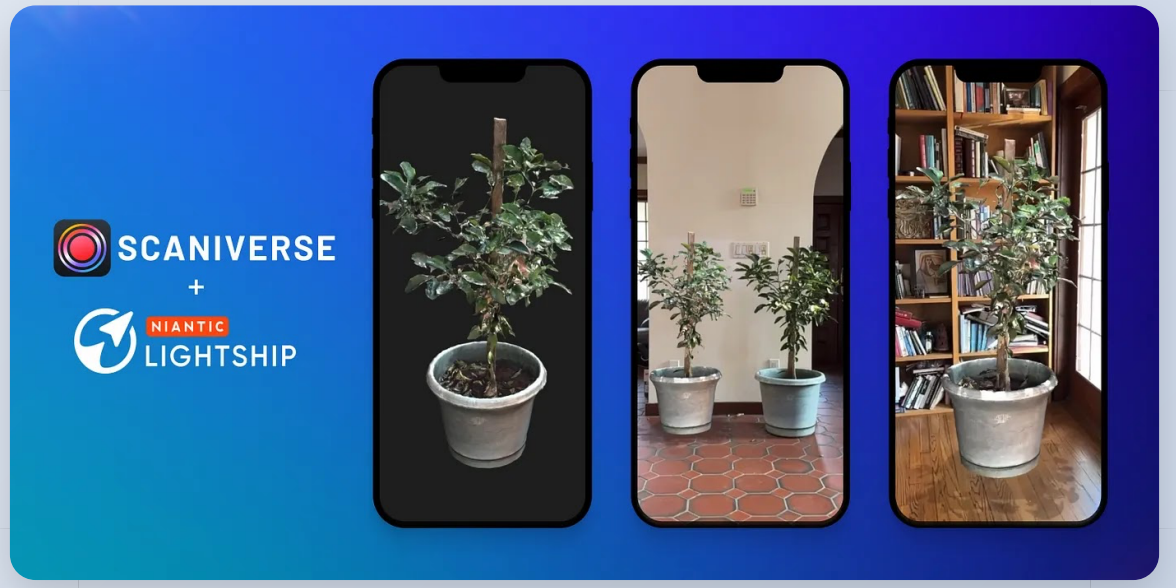
Platform: iOS Mobile

Unity | C# | AR Foundation | RTAB-Map | Firebase | REST API | Swift Integration

Onsiter is a construction project management platform combined with 3D scanning technology using smartphones to create real-time 3D models. It helps contractors and managers track construction progress and allocate

work efficiently. The system is accessible from both mobile devices and web browsers for maximum convenience.

- **Built the entire 3D processing application** using Unity from scratch, including core logic, UI/UX, and user interactions
- **Integrated and customized the RTAB-Map library** for real-time 3D scanning and reconstruction on iOS devices
- **Implemented RESTful API integration** for seamless data synchronization between mobile and backend systems
- **Integrated native Swift code** with Unity for iOS-specific functionalities and hardware optimization
- **Collaborated with backend and web developers** to ensure stable cross-platform data exchange
- **Managed deployment pipeline** to TestFlight for internal testing and BrSE (Bridge System Engineer) review



3D Scanning Technology Demo - Real-time reconstruction using smartphone

⚠️ **Confidentiality Notice:** Due to product confidentiality, the actual project source code, UI screenshots, and demo videos cannot be publicly disclosed. The image shown above is for **illustration purposes only** to demonstrate the 3D scanning technology concept. Detailed technical explanations, architecture discussions, and work samples can be shared privately during interviews upon request.

Technical Skills

💻 Programming Languages

C#, C++

🎮 Game & AR Development

Unity Engine, AR Foundation, 3D Processing, RTAB-Map

🖥️ Desktop Development

C++ Desktop, MFC Framework, DLL Architecture, ODA SDK

🔧 Tools & Services

Git, Firebase, REST APIs, TestFlight

📱 Platform Experience

Windows Desktop, iOS Mobile Development

🌐 Integration Skills

Swift-Unity Bridge, API Integration, Cross-platform Development

Education & Certifications

Da Nang University of Science and Technology

Degree: Bachelor of Information Technology

Major: Information Security

Duration: 2020 - 2024

GPA: 3.2 / 4.0

📜 Certifications:

- TOEIC 600 Certificate - English Proficiency

Awards & Achievements

🏆

Employee of the Month

Prima Solutions | July 2024

Recognized for outstanding performance and dedication in developing the Onsiter 3D scanning application. Successfully delivered critical features on time, demonstrated exceptional problem-solving skills in integrating RTAB-Map library with Unity, and maintained high code quality throughout the development cycle.
